

Commercial Super Urns

10-40 litres

The Professional's Choice

These high-quality electric urns have a fresh new design but are still proven performers because they are safe, reliable and long-lasting. A size to suit all needs. Polished stainless steel body with vented cool to touch 'twist-to-lock' lid.

Features and benefits

- Chrome plated brass tap at a comfortable cup height
- Polished stainless steel body with vented 'twist-to-lock' lid
- Welded joints for superior corrosion resistance and effortless cleaning
- Thermostat has variable settings with 'Hi' and 'Low' for greater control over the boiling water
- Push-button over temperature cut-out turns off the power if the urn boils dry
- Non drip tap prevents accidents and mess
- Power indicator light
- Water level gauge
- Heat-resistant knobs
- Easy-lift safety handles
- Lockable lid

Installation

Easy to install on a stable worktop.

Electrical

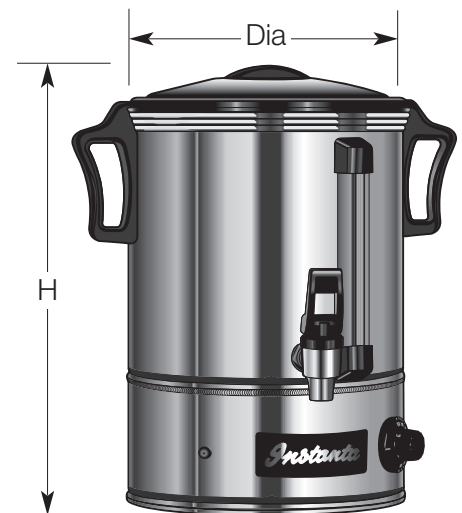

To be connected to a 230 volt supply with a suitable break capacity. Supplied with 1.75 metres of cable and plug.

Plumbing

Manual Fill.

Construction

Polished stainless steel case.
