

5 Secure the font & connect the drain hose

- Working from underneath, secure the Tap & Font with the Font mounting nuts & washers supplied.
- Connect font bowl to a permanent trapped waste drain using the flexible drain hose and worm drive clamp supplied, see below.
- The drain hose carries drips and spillages from the drip tray to waste.
- Refer to the Installation instruction supplied with the under counter boiler and or chiller ,for system connections, and commissioning.

- Take care to install tubes correctly. No kinks, sags, pinches or loops.
- Ensure there is a constant fall from the tap down to the under counter appliance.

6 Under counter appliance connections

Refer to the Installation instruction supplied with the under counter boiler and or chiller for system installation, commissioning and use.

Mains In	Mains potable water supply.
Control cable	Connected the Tap.
Boiling out	Red silicone tube from tap. Cut to length.
Chilled out	(BC) blue plastic pipe from tap. Cut to length.
Vent	White silicone tube from tap. Cut to length.

7 Cleaning and general maintenance

- To clean tap, font, under-counter appliance and ancillaries, wipe surfaces with a sanitising wipe and leave to air dry.

Installation instructions

Instanta InstaTap

Dispensing tap & font

Using these instructions

Please refer to all safety and installation requirements detailed in the installation instruction provided with the InstaTap system prior to installation of, or any change to, the complete system.

WARNING

Read the instructions

Before commencing the installation, download & read the InstaTap appliance installation instructions

The InstaTap is only designed to be installed on a work top - it is not suitable for over-sink installation.

Tools needed for installation (not supplied)

In addition to normal tools, the following (or equivalent equipment) will be required.

- 121mm diameter hole saw for worktops.
- 51mm diameter hole saw for worktops.
- Tube spanner for 8mm font mounting nuts.
- 10mm drill bit for font mounting stud holes.
- Jigsaw with suitable blade for worktop material.

Be aware of the risks of hazards which could cause harm when using tools. Assess the risks before starting the installation.

Water supply pressure requirements

2 - 5 bar.

Parts supplied in the kit

Qty	Description
1	Counter-top water Font & Tap inc tubes & cable
1	Font grille & bezel
3	Mounting stud, nut & washer
1	Font template
1	19mm ID hose
